Mandarine Gestion is approved in France and regulated by the Financial Markets Authority (Autorité des Marchés Financiers).

Date of production | 01/01/2024

Please note

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type | Mandarine Opportunités (hereinafter "the UCITS" or "the MF" or "the UCI") is a Mutual Fund established under French law. As the Mutual Fund is not a legal entity, it is not subject to corporate income tax. Each holder is taxed as if he/she were the direct owner of a portion of the assets, depending on the tax regime applicable to him/her.

Duration | The UCI was established on 26 September 2008 and has an expected lifetime of 99 years.

Objectives | Mandarine Opportunités aims to outperform, net of fees, the CAC All Tradable NR index (dividends reinvested) over the recommended five-year investment period, by using an active stockpicking strategy to select French companies or those listed in France that meet positive ESG (environment, social, governance) criteria according to a Best-in-Universe approach (ESG selection giving priority to issuers within the investment universe that have the highest ratings from a non-financial point of view, regardless of their business sector) and an above-average growth profile according to the management company's analysis. The process for managing the Fund is firmly based on the belief that a company's long-term market performance depends on the magnitude and quality of the growth it generates and the integration of ESG criteria into its strategy.

Specifically, the Fund aims to select companies of all capitalisations which show above-average growth in their results and margins and whose potential has not yet been anticipated by the market. The financial analysis will focus on the selection of growth-style securities with three main profile types according to specific indicators: established companies, companies in transition and companies with potential, according to the Management Company's analysis.

The ESG process incorporates limiting non-financial environmental (carbon footprint in tonnes of CO₂, etc.), social (working conditions, health and safety) and governance (functioning of governance bodies, etc.) criteria across the investment universe. Issuers in the investment universe with an ESG rating are ranked by quintile ranging from A to E. Issuers belonging to the A-B-C-D quintiles are eligible and pass the ESG filter upstream of the investment process. Issuers classified as "E" are excluded from the investment universe; the ESG filter excludes 20% of issuers with an ESG rating. The ESG investment strategy has the potential to create sector bias, in relation to both the investable universe and the Fund's benchmark index.

The portion of ESG-rated issuers in the Fund's portfolio (excluding IMM public debt or receivables and cash) will be above 90% in the long term. As part of its cash management and depending on market conditions or the manager's expectations, the Fund may also invest up to 25% of its assets in debt securities (issued by any types of issuers with an Investment Grade rating or which are deemed by the Management Company to be equivalent) and in money market instruments. Financial futures may be used for hedging or gaining exposure to equity risk. The Fund exposure may reach 105% of net assets. The Fund may invest up to 10% of its assets in French or foreign UCIs that comply with Directive 2009/65/EU as amended, where applicable managed by Mandarine Gestion.

Management objective: To achieve a higher return than that of its benchmark index.

The Fund takes sustainability risks and ESG characteristics into account in its selection process. In this regard, the Fund promotes environmental or social characteristics within the meaning of Article 8 of the SFDR Regulation. The Fund is subject to a sustainability risk as defined in the risk profile of the prospectus.

Benchmark index | CAC All Tradable Net Return

Distribution of income | Capitalisation

Deadline for the centralisation of subscription/redemption orders |

Subscription and redemption requests for units are received by BNP Paribas no later than 13.00 on each day that is not a public holiday on the Paris Stock Exchange and are executed on the basis of the next net asset value.

The prospectus, the annual reports and the latest periodic documents, as well as all other practical information, including where to find the latest unit

price, are available on our website at www.mandarine-gestion.com or on written request, free of charge, to: Mandarin Gestion - 40 avenue George V - 75008 Paris.

What are the risks and what could I receive in return?

Risk indicator

The risk indicator assumes that you hold the units for five years.

Please note: The actual risk may be very different if you opt for an early exit, and you may receive less in return.

The synthetic risk indicator makes it possible to assess the level of risk of this product in relation to other products. It indicates the likelihood of this product incurring losses in the event of market movements or our inability to pay you.

Performance scenarios (amounts expressed in euro) I

What you get out of this product depends on future market performance. The future trend of the market is random and cannot be accurately predicted. The unfavourable, intermediate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the last ten years. Markets may evolve very differently in the future. The stress scenario shows what you might receive in extreme market situations. This type of scenario occurred for an investment between one and five years.

Recommended holding period: 5 years

Example of an investment: € 10,000

Scenarios		If you exit after one year	If you exit after 5 years (Recommended holding period)
Minimum	As this product does not provide market protection, there is no guaranteed minimum return if you exit before five years. You could lose all or part of your investment.		
Tensions	What you could receive after deducting costs	€ 2,860	€ 1,950
	Average annual return	-71.41%	-27.85%
Unfavourable	What you could receive after deducting costs	€ 8,290	€ 9,480
	Average annual return	-17.13%	-1.07%
Intermediate	What you could receive after deducting costs	€ 10,660	€ 13,700
	Average annual return	6.59%	6.50%
Favourable	What you could receive after deducting costs	€ 13,920	€ 16,850
	Average annual return	39.16%	11.00%

The figures shown include all costs of the product itself as well as fees due to your advisor or distributor. These figures do not take into account your personal tax situation which may also affect the amounts you receive.

This table shows the amounts that you could obtain according to different scenarios and the following parameters:

- an investment of €10,000;
- and holding periods of one year and five years, the latter being equal to the recommended holding period.

These different scenarios indicate how your investment might perform and allow you to make comparisons with other products.

The scenarios presented are an estimate of future performance based on past data on changes in the value of this investment. They are not an accurate indicator. What you receive will depend on how the market develops and how long you hold the investment or product, as well as your personal tax situation.

It is not easy to exit this product. If you exit the investment before the end of the recommended holding period, there is no guarantee and you may incur additional costs.

What happens if Mandarin Gestion is unable to make payments?

Mandarin Gestion is a portfolio management company approved and monitored by the Financial Markets Authority (Autorité des Marchés Financiers) and must comply with organisational and operational rules, particularly with regard to equity. The investor's funds or the income of the UCI are paid into one or more bank accounts opened in the name of the UCI. Consequently, the default of Mandarin Gestion would not have an impact on the assets of the UCI. The UCI does not benefit from a compensation scheme.

How much will this investment cost me?

You may be asked to pay additional costs by the person selling or advising you about the product. If this is the case, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time (amounts expressed in euro):

The tables show the amounts taken from your investment to cover the different types of costs. These amounts depend on how much you invest, how long you hold the product and how the product performs. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We used the following assumptions:

- that in the first year you would get back the amount you invested (0% annual return). that for the other holding periods, the product evolves as indicated in the intermediate scenario.
- € 10,000 is invested.

	If you exit after one year	If you exit after five years (Recommended holding period)
Total costs	€ 441	€ 2,004
Annual cost impact (*)	4.41%	2.99% each year

(*) It shows the extent to which costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 9.50% before costs are deducted and 6.50% after this deduction.

We may share the costs with the person selling you the product in order to cover the costs they provide to you. This person will inform you of the amount.

These figures only include any potential fees that the person selling or advising you on the product may charge you. This person will inform you of the actual distribution costs.

Composition of costs:

One-off entry or exit costs		If you exit after one year
Entry costs	2.00% of the amount you pay when you enter the investment. This is the maximum amount you will pay. The person selling you the product will inform you of the actual costs.	EUR 200
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0
Recurrent costs levied each year		
Management fees and other administrative and operating expenses	2.34% of the value of your investment per year. This estimate is based on actual costs over the past year.	EUR 234
Transaction costs	0.33% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.	EUR 43
Ancillary costs levied under certain conditions		
Performance-related fees and profit-sharing fees	15.00% of the outperformance above the benchmark (CAC All Tradable Net Return) even in the event of a negative performance. The actual amount varies depending on the performance of your investment. The above estimate of total costs includes the average over the last five years.	EUR 0

How long do I have to keep it and can I withdraw money early?

The recommended investment horizon is a minimum of five years due to the nature of the underlying asset of this investment. The units of this UCI are medium-term investment vehicles and should be acquired with a view to diversifying your assets. You can redeem your units daily, redemption transactions are executed daily. Holding for less than the recommended period is likely to penalise the investor.

How can I make a complaint?

You may make a complaint about the product or the conduct of (i) Mandarine Gestion (ii) a person who provides advice about the product, or (iii) a person who sells the product, by sending an e-mail or a letter to the following persons, as appropriate:

- If your complaint concerns the product itself or the behaviour of Mandarine Gestion: please contact Mandarine Gestion by e-mail (serviceclient@mandarine-gestion.com) or by post, preferably with acknowledgement of receipt (Mandarine Gestion - for the attention of the Risk and Compliance Department - Mandarine Gestion - 40 avenue George V - 75008 Paris). A complaints procedure is available on the company's website at https://www.mandarine-gestion.com/uploads/reg/reg_mandarine_reclamation-traitement_en.pdf
- If your complaint concerns a person who provides advice on or offers the product, please contact that person directly.
